See the *source code of this Markdown file* to see the configuration settings. **Die Reihenfolge im YAML-Block ist sehr wichtig!**

1 Introduction

This is an example Markdown configuration file with colored links and highlighted code using JetBrains Mono font¹.

The configuration settings are placed in a so called YAML front matter block at the beginning of the file. The settings are used by the Pandoc document converter to create a PDF file from this Markdown file.

2 PDF Generation

If you use assets folder, then better change to the directory, where the markdown file is located and run the following command:

```
1 # This file with xelatex engine
2 pandoc ExampleConfig.md -o ExampleConfig.pdf --pdf-engine=xelatex --toc=true --toc-depth=5
  ↳ --highlight=tango --number-sections --shift-heading-level-by=-1 -s && echo "\n\nPDF generated
  ↳ successfully\n\n" || echo "\n\nError generating PDF\n\n"
```

```
1 # This file with lualatex engine
2 pandoc ExampleConfig.md -o ExampleConfig.pdf --pdf-engine=lualatex --toc=true --toc-depth=5
  ↳ --highlight=tango --number-sections --shift-heading-level-by=-1 -s && echo "\n\nPDF generated
  ↳ successfully\n\n" || echo "\n\nError generating PDF\n\n"
```

¹You have to open this file in a text editor to see the configuration settings. BTW: This is a long footnote.

```

1 # Or any other file
2 pandoc ReadMe.md -o ReadMe.pdf --pdf-engine=xelatex --toc=true --toc-depth=5 --highlight=tango
   ↳ --number-sections --shift-heading-level-by=-1 -s && echo "\n\nPDF generated successfully\n\n" ||
   ↳ echo "\n\nError generating PDF\n\n"

```

3 Emojis

- Normal Text 📌important text.
- Adapts to text size 📌
- Bigger Alarm: 🚨

You can create custom commands for emojis like this, see [Pandoc/Official-Documentations/twemojis.pdf](#).

```

1 % Light bulb (idea) - 1f4a1
2 \newcommand{\idea}{\twemoji{1f4a1}}
3 \newcommand{\ideatext}{\texttwemoji{1f4a1}}
4 \newcommand{\ideabig}{\twemoji[height=2em]{1f4a1}}
5
6 % Man dancing - 1f57a
7 \newcommand{\dancer}{\twemoji{1f57a}}
8 \newcommand{\dancertext}{\texttwemoji{1f57a}}
9 \newcommand{\dancerbig}{\twemoji[height=2em]{1f57a}}
10
11 % Key - 1f511
12 \newcommand{\key}{\twemoji{1f511}}
13 \newcommand{\keytext}{\texttwemoji{1f511}}
14 \newcommand{\keybig}{\twemoji[height=2em]{1f511}}
15
16 % Prohibited - 1f6ab
17 \newcommand{\prohibited}{\twemoji{1f6ab}}
18 \newcommand{\prohibitedtext}{\texttwemoji{1f6ab}}
19 \newcommand{\prohibitedbig}{\twemoji[height=2em]{1f6ab}}
20
21 % Target/Bullseye - 1f3af
22 \newcommand{\target}{\twemoji{1f3af}}
23 \newcommand{\targettext}{\texttwemoji{1f3af}}
24 \newcommand{\targetbig}{\twemoji[height=2em]{1f3af}}
25
26 % Firecracker - 1f9e8
27 \newcommand{\firecracker}{\twemoji{1f9e8}}
28 \newcommand{\firecrackertext}{\texttwemoji{1f9e8}}
29 \newcommand{\firecrackerbig}{\twemoji[height=2em]{1f9e8}}
30
31 % Warning - 26a0
32 \newcommand{\warning}{\twemoji{26a0}}
33 \newcommand{\warningtext}{\texttwemoji{26a0}}
34 \newcommand{\warningbig}{\twemoji[height=2em]{26a0}}
35
36 % Trophy - 1f3c6
37 \newcommand{\trophy}{\twemoji{1f3c6}}
38 \newcommand{\trophytext}{\texttwemoji{1f3c6}}
39 \newcommand{\trophybig}{\twemoji[height=2em]{1f3c6}}

```

4 Links

Here's a [blue link to Google](#).

5 Block Quotes

Here's a block quote:

This is a block quote.

6 Code Highlighting

6.1 Within single backticks

Here's an example `inline code` in JetBrains Mono.

6.2 Python Code

Here's an example of Python code with syntax highlighting in JetBrains Mono:

```
1 def greet(name):
```

6.3 TypeScript Code

Here's an example of TypeScript code with syntax highlighting in JetBrains Mono:

```
1 function greet(name: string): void {  
2     console.log(`Hello, ${name}!`);  
3 }
```

6.4 Bash & Shell

And here's some bash code:

```
1 # bash code  
2 echo "Hello, World!"  
3 for i in {1..5}  
4 do  
5     echo "Count: $i"  
6 done
```

7 Nested Headings

7.1 Third Level

Some third level text.

7.1.1 Fourth Level

Some fourth level text.

7.1.1.1 Fifth Level

Some fifth level text.
